Interact

Through the power of Rapid Prototyping, enter your virtual 3D design & win a physical model!

WHAT IS RAPID PROTOTYPING?

Rapid prototyping is a technology that allows you to bring your video game character into the real world. It's not science fiction any more.

HOW DOES IT WORK?

A 3D printer takes your virtual 3D computer design directly from the computer & literally draws it layer by layer until you end up with physical 3D model you can hold in your hand. Really!

WHO IS ELIGIBLE TO ENTER?

Students from any program of a Hawaii high school, college or university are eligible to enter. Entry could be either a personal or school defined project. One high school level winner & one college level winner will be announced. Entries may be from any field such as Engineering, Architecture, Art, Science, Medical, etc. High schools include public and private. Colleges or universities include private or state.

WHEN DOES THE COMPETITION START AND END?

Entries accepted **April 2, 2007** through **December 19, 2007**.

WHERE CAN MORE INFORMATION ABOUT THE COMPETITION BE FOUND?

Please go to www.thinkrapid.com/design for an entry form and complete terms & conditions. This competition is designed to promote STEM (Science, Technology, Engineering & Mathematics) curricula in Hawaii schools by exposing Hawaii students to new, innovative technologies.

3D Printed Model

3D Computer Model.
